WOODLANDS
FAMILY DENTAL
BRETT A. MURPHEY, DDS

From the moment you walk through the door, Woodlands Family Dental welcomes you with a relaxing, spa-like atmosphere and a warm greeting from one of their many friendly staff members. The reception area lacks the typical old-magazine-and-uncomfortable-chair office feel; instead, rich aromatherapy scents bathe your senses and immediately unwind you, while relaxation music plays quietly in the background to ease any tension in your body. If it has been a busy day for you, wind down in one of their comfortable chairs with a coffee or tea from their complimentary beverage bar. For your convenience in today's busy world, there is a guest internet station and large LCD flat screen television- where you are in charge of the remote control.

For guests with children (or for adults who are children at heart!) there is a separate viewing room with a 40-inch LCD flat screen hooked up to an Xbox and DVD player. Children are welcome to enjoy the beanbag chairs in the viewing room while their parents or siblings are visiting with Dr. Murphey.

Dr. Brett Murphey, owner of Woodlands Family Dental, understands the importance of a relaxing atmosphere in an environment that is usually found to be harsh and sterile. An appointment with Woodlands Family Dental is an experience like none other because client comfort is of the utmost importance. Not only do they go out of their way to make sure you are completely at-ease, but they maintain the highest standards of cleanliness and sterility.

DR. BRETT MURPHEY was born and raised in the Houston area. He completed his undergraduate studies at Texas A&M in biomedical science, and he taught 9th grade science at Eisenhower High School before becoming a dentist. He was loved by his students and even awarded "Teacher of the Month" by the student body—Mr. February!

Dr. Murphey graduated at the top of his class, with honors, from the University of Texas dental branch at Houston. He has also extended his education by spending hundreds of hours studying areas such as cosmetic dentistry, orthodontics and sedation dentistry. As a speaker for the American Dental Association, Dr. Murphey is able to share his expertise with his colleagues. He has reached higher than many doctors of his profession working to ensure that every patient walks away with a dazzling smile.

In his personal life, Dr. Murphey and his wife Crystal have a beautiful daughter named Elizabeth. He has volunteered for nine years at an orphanage clinic in Matamoros, Mexico on a yearly mission trip, where he provides dental care to over 200 orphans. He also enjoys riding motorcycles, golfing, boating, skiing, scuba diving and playing softball on his church's team.

Before your appointment begins, you are invited to speak with a team member about any dental issues you may be encountering. The staff is warm and welcoming, and will listen to your concerns while taking your comfort into consideration. As your appointment begins in the treatment room, you will be given the option to take control of the HDTV television (moved around anywhere for your ease of viewing) and a set of headphones, so that you can be in charge of what you watch. You can also choose to forgo the television and listen only to music on the headphones if you prefer.

Woodlands Family Dental provides a variety of dental services to clients ranging from a simple cleaning to the most complex cosmetic work, including implants and veneers. Whatever your need, they can assist you while providing the most relaxing dental environment in The Woodlands. Procedures are easy and convenient; Dr. Murphey is proud of his skilled team and their ability to accommodate your busy schedule by providing single-visit dental care, including single-visit crowns. Woodlands Family Dental has a remarkable machine that will provide you with the highest quality of crown in one visit. You read it right- no messy impressions, no sensitive temporary crown, and no second visit! All of this while preserving as much of your natural tooth as possible. If you've had a negative dental experience, Dr. Murphey has the solution for you. Sedation is available for patients who want to be completely relaxed and enjoy a positive dental experience.

You will not be surprised to know that the latest in technology is used at Woodlands Family Dental. Their digital x-ray sensors expose you to 90% less radiation than common x-ray machines. Amazing hand-washing stations provide Dr. Murphey and his staff with access to the same standard of sterility that doctors require in an operating room at a hospital. Isolite systems allow you to relax your jaw during treatment, and an intraoral camera allows you to see and understand your diagnostic and treatment needs. These features are not only important to Dr. Murphey, but they are his minimum standards. He is constantly on the lookout for modern technology that will improve the quality and care of your dental experience.

According to surveys sent out after appointments, 99% of patients surveyed this year said they'd refer a friend or family member to Woodlands Family Dental! "I feel that Dr. Murphey is an excellent dentist

and has great concern for his patients," said Sharon Forbes, a patient. "His office staff makes you feel welcome and they have your best interest in mind when taking care of your needs. I will always recommend Dr. Murphey to any one who needs a good dentist.

It is commonly recommended that the general population receive dental cleaning and care every six months. This is, of course, dependent on your own personal needs. Dr. Murphey and his team want to be your dentist for life, and with such fabulous amenities and personal care, why wouldn't you want to be his patient for life? Experience the difference Woodlands Family Dental has to offer by calling for your convenient appointment today.

Woodlands Family Dental is located at 1400 Research Forest Dr., #120 in The Woodlands. To make an appointment, please call 281.681.9600 or visit www.WoodlandsDental.com for more information.
